Real-time Digital Startup Ecosystem Portals

for cities, counties & different business verticals

Digitally Connecting Communities To Remove Startup Ecosystem Fragmentation

Startup Ecosystems are collaborative by nature and communities driven by supporting organizations within create and coordinate connections & interactions amongst the key actors and various stakeholders in the ecosystem, yet digitally fragmented and siloed.

Digital startup ecosystem connect communities and empower them with digital tools, to manage and coordinate support services and community activities like events, training, networking, workshops, etc. for their members and customers, - and to facilitate natural interactions between members like; co-founder matching, mentoring & advisory sessions, investor evaluations in a digital form.

Permanently fix the fragmentation and disconnectivity of the ecosystem with holistic approach and provide true "one stop shop" ecosystem portals with real-time information about services, events, startups, statistics and more, - while respecting each community's own rules, domains and brand identities.

Digital startup ecosystem is the product of collaborative effort, expressing the true nature of globally connected digital age startup ecosystems.
